

One Company, All The Expertise You Need

Keeping up with low carbon and renewable energy targets, building regulations, planning requirements and the huge choice of products on the market can present a real challenge.

At IHS we provide a complete range of products, services, solutions and skills from consultation and advice through project management, installation and commissioning for both large and small projects.

IHS Product Portfolio

We design, supply and install a range of energy efficient and renewable heating, cooling, hot water and energy systems. Our products can be fully integrated to offer a complete heating and hot water solution to deliver enhanced, year-round efficiency.

- Underfloor Heating & Cooling
- Wall Heating & Cooling
- Ground, Air & Water Source Heat Pumps
- Solar Thermal Systems
- Solar PV Systems
- Micro District Heating Systems
- Road Energy Systems
- Heat Recovery Systems
- Domestic Water Systems

Why Choose IHS?

- Design expertise including full heat loss calculations, full system design, insurance-backed and fully supported by our suppliers
- Close working relationship with our clients to design solutions uniquely tailored to meet individual requirements
- Practical advice and support from system concept through installation and service
- Enhanced building efficiency; reduced carbon footprint. We're helping tackle low carbon living in the decades to come
- IHS systems deliver controlled running costs, exceptional performance and efficiency, delivering reduced bills and increased property value

Our Clients Include...

- Property developers
- Self-builders
- Homebuilders & property renovators
- Architects
- Plumbers
- M&E companies
- Specifiers
- Installation engineers and technicians

IHS Solutions

Underfloor Heating

Ground Source Heat Pumps

Air Source Heat Pumps

Thermal Stores & Hot Water Tanks

Solar Thermal Systems

Manifolds, Pipe & Controls

Road Energy

Lewis Plates

Design Experience

At IHS we concentrate on embedding sustainability into every heating, cooling and hot water system that we design.

No two buildings are the same and every one of our clients has a unique set of requirements when they come to us. Each project on which we work is tailor-designed to suit our clients' needs. Uniquely, all IHS systems carry a full design guarantee.

Our professional experience, technical knowledge and understanding of sustainable energy methodologies have earned us our reputation as an industry leader in the area of energy efficient heating and cooling.

Project Management

We can manage any project on which we work from consultation right through to commissioning including system installation. This means we take on the responsibility of ensuring that whatever we design and install works for you.

Examples of IHS Work

Over the past fifteen years, we've designed thousands of heating systems throughout the UK – from the tiniest apartments to castles, schools and hospitals. We've taken heat from the ground, air, the sea, sun, rivers and canals as well as working with more conventional heat sources such as oil and gas.

We've installed heating systems into:

- Private homes
- Social housing
- Schools, University Accommodation, Kindergartens
- Hospitals, Care Centres and Nursing Homes
- Banks
- Community Centres
- Castles and stately homes
- Multiple dwelling buildings
- Offices blocks and factories
- Railway Stations
- Visitor Centres
- Swimming Pools
- Garden Centres

IHS Offer

Concept & Design – we do this by working closely with you, our client, to ensure you get the system most appropriate to your requirements

Product Portfolio – we conduct ongoing research to ensure we offer the highest performance and energy efficient products in the market

Installation – this is typically a multi-skilled area. We have a team of trusted installers with whom we've worked for many years who have proven their ability to work to our standards

Commissioning – Ensuring every system has been installed correctly in accordance with strict guidelines

System Maintenance – Offering ongoing peace of mind for our clients
