

Compact Heat Pump (Single Phase)

	Suitable for ground or water source heat extraction. Suitable for properties that require a larger heat pump but do not have 3-phase electricity		
Size	2 x 8kW 2x 10kW 2x 12kW		
Refrigerant	R407C, CFC-free (flow temperatures up to 55C)		
Voltage	230V (Single Phase)		
Description	With scroll compressor, large condenser, built-in evaporator with expansion valve & inspection glass. Built on robust frame with heat and sound-proof insulation, five flexible connection hoses, electric wiring with on/off switching, controls and safety features. Refrigerant-filled. System-tested.
